DETAILED ACTION

1. Applicant's election with traverse of claims 18-27, 31, 32 and 34-37 in the reply filed on September 01, 2004 is acknowledged. Applicant has not specified the grounds of the traversal therefore the restriction stands.

The requirement is still deemed proper and is therefore made **FINAL**.

Drawings

2. New corrected drawings are required in this application because the presently added figure 10 is not clear. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 20-23 and 35-37 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. "One third", "one fourth", "one fifth", "one sixth" and "one seventh" longitudinal fins are not described in the specification or

Art Unit: 3641

shown in the drawing and is unclear as to how the longitudinal fins are fractionally segmented as claimed.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 24 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 24 recites the limitation "the exterior" in page 3, line 12. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless – (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 18, 25, 27, 31, 32 and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Ratliff (5,415,365). Ratliff teaches a lifting arrangement for a circular fuselage (col. 1, lines 10-13) comprising: at least one first longitudinal fin (30) and at least one second longitudinal fin (30a) which are fixed, each of the fins positioned on lateral lower portions of the fuselage (figures), wherein the at least one first and at least one second longitudinal fins form a channel with the underside of the fuselage, the channel including the nose and tail of the fuselage (fig.3), and wherein the longitudinal

Art Unit: 3641

fins are curved around an axis approximately parallel to a longitudinal axis of the fuselage (col. 3, lines 11-12).

9. Claims 18, 19, 25, 27, 31, 32 and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Gioia (4,691,881). Gioia teaches a lifting arrangement for a circular fuselage (11) comprising: at least one first longitudinal fin (25) and at least one second longitudinal fin (25) which are fixed, each of the fins positioned on lateral lower portions of the fuselage (figures), wherein the at least one first and at least one second longitudinal fins form a channel with the underside of the fuselage (fig. 2), the channel including the nose and tail of the fuselage (fig.2); wherein Gioia teaches a third and longitudinal fin positioned on the lower portion of the fuselage.

Although the above references do not discuss a lifting body the same structure will possess the same effect.

Claim Rejections - 35 USC § 103

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

11. Claim 26 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ratliff (5,415,365) in view of Gioia (6,290,174). Ratliff teaches all the limitations of claim 26 except the fins being retractable. Gioia teaches a lifting arrangement for a fuselage comprising: at least one first longitudinal fin and at least one second longitudinal fin

Art Unit: 3641

(100) which are retractable (col. 4, lines 1-2). At the time of the invention, it would have been obvious to one ordinarily skilled in the art to have the longitudinal fins of Ratliff be retractable as taught in Gioia for efficient landing and takeoff by providing additional stability.

Allowable Subject Matter

12. Claim 24 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

13. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
